HOLIDAY HOMEWORK

GRADE IV

Summer skies and brighter days,
Time for fun in different ways.
Books to read and games to play,
New things to learn every day.
Explore your world, create, and grow,
There's so much more you'll get to know!

Dear Parents,

The long-awaited summer vacation is finally here! This is a season to relax, explore, and enjoy special moments with your little one. While play and rest are essential, the break also provides beautiful opportunities to nurture creativity, curiosity, and care. Let's remember—what truly stays with children are not the things we buy for them, but the **time we spend**, the lessons we share, and the stories we tell. Use this time to build joyful memories, strengthen bonds, and nurture small acts of responsibility.

Here are some thoughtful ways to make this break both **fun and fruitful**:

- Include yoga, stretching, dance, or any physical activity in their daily routine.
- Encourage your child to keep a **"Summer Journal"**: they can draw, write simple sentences, or paste pictures about their day. Add funny family stories, memories, or a "What I liked today" section.
- Play board games like Snakes & Ladders or Memory Match—great for counting and focus!
- Set up pretend play: post office, vegetable market, or picnic day.
- Create obstacle courses using cushions or buckets—great for motor skills!

During the holidays, encourage your child to maintain a regular practice routine. Prepare two simple practice notebooks—one for **English and Hindi handwriting** and the other for **Math sums**. A little bit of daily writing and number work will help keep their skills sharp and build confidence. Remind them to work neatly and independently, completing one or two pages each day.

The theme for the Holiday Homework is **THE SEVEN SISTERS OF INDIA.**

- All homework must be **handwritten**, decorated neatly, and submitted in a creative folder with the **name and class** mentioned.
- Drawings and original work by the child are valued the most, with parental guidance.

School will reopen on 1st July
Holiday Homework to be submitted on 5th July

The Holiday Homework will be assessed on:

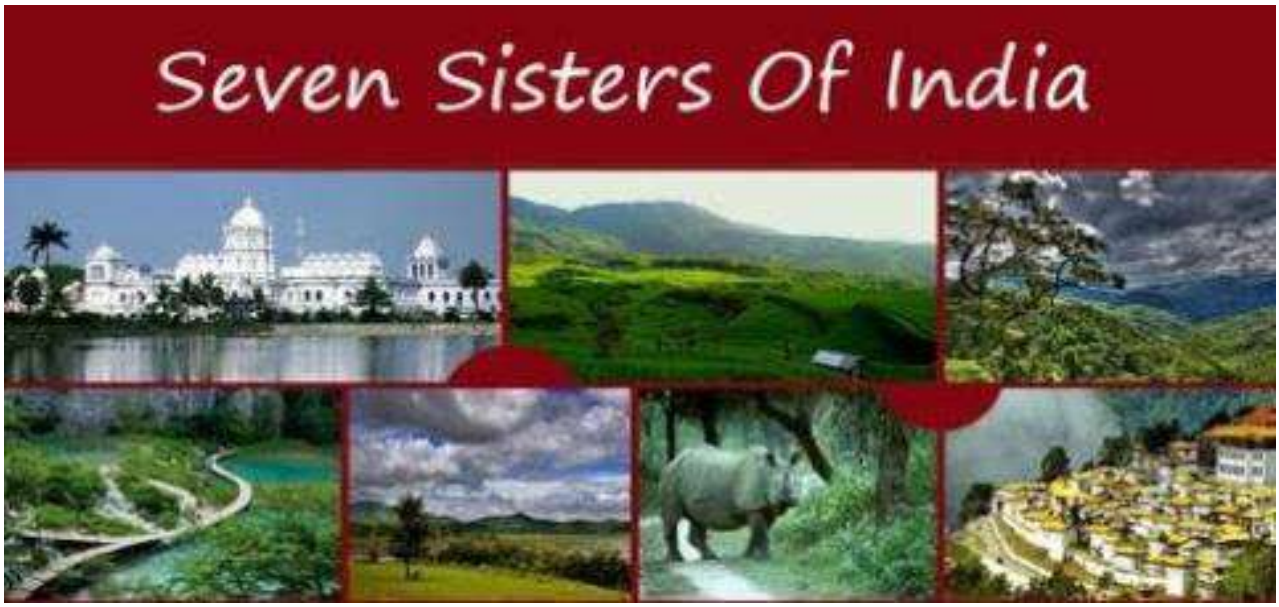

- Idea and content
- Presentation
- Ability to explain or answer
- Innovativeness
- Creativity

Let this summer be filled with sunshine, giggles, and stories that your child will remember for a lifetime.

Warmest regards,

Ms. Neelu Sharma
Principal

THE SEVEN SISTERS OF INDIA

"*The Seven Sisters of India are not just states on the map, but vibrant threads in the fabric of the nation — each one weaving its own story of culture, beauty, and pride*."

The Northeastern States are often known as *the Seven Sister* states because they are interdependent on one another. All these states are connected to India via Siliguri Corridor. Hence, that is the only way to reach the Seven Sister States.

The *Seven Sisters* of India refers to the seven contiguous states: Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland and Tripura. Nestled between the eastern Himalayas, the Patkai ranges and the Brahmaputra and Barak river valleys, this cluster is celebrated for its breathtaking landscapes—from Assam's mist-shrouded tea gardens and Arunachal's snow-capped peaks to Mizoram's rolling hills and Meghalaya's living root bridges. Ethnically and linguistically diverse, each state boasts its own rich tapestry of tribal traditions, festivals, folk music and indigenous crafts, yet they share strong cultural affinities and histories of inter-state trade, pilgrimage and kinship. Despite challenges of connectivity and development, the Seven Sisters have emerged as gateways to Southeast Asia, leveraging ecotourism and cross-border cooperation to preserve their environment and heritage while forging new economic and infrastructural links with the rest of India.

MATHEMATICS

The Seven Sisters of India are not just diverse in culture and geography, but also offer fascinating opportunities to explore mathematical concepts. From calculating the heights of the Eastern Himalayas in Arunachal to measuring the rainfall averages in Meghalaya, math is deeply woven into the fabric of this region. The winding rivers, like the Brahmaputra in Assam, can be studied through geometry and flow rates, while population data and literacy rates of each state introduce students to statistics. Even the intricate patterns found in traditional handlooms and tribal art reflect symmetry, tessellations, and fractions. Thus, the Seven Sisters and math together form a beautiful equation that combines culture with calculation.
